

# MGSF2N02EL, MVSF2N02EL

## MOSFET – N-Channel, SOT-23

### 2.8 A, 20 V

These miniature surface mount MOSFETs low  $R_{DS(on)}$  assure minimal power loss and conserve energy, making these devices ideal for use in space sensitive power management circuitry.

#### Features

- Low  $R_{DS(on)}$  Provides Higher Efficiency and Extends Battery Life
- Miniature SOT-23 Surface Mount Package Saves Board Space
- $I_{DSS}$  Specified at Elevated Temperature
- AEC Q101 Qualified and PPAP Capable – MVSF2N02EL
- These Devices are Pb-Free and are RoHS Compliant

#### Applications

- DC-DC Converters
- Power Management in Portable and Battery Powered Products, ie: Computers, Printers, PCMCIA Cards, Cellular and Cordless Telephones

#### MAXIMUM RATINGS ( $T_J = 25^\circ\text{C}$ unless otherwise noted)

| Rating                                                                         | Symbol          | Value      | Unit               |
|--------------------------------------------------------------------------------|-----------------|------------|--------------------|
| Drain-to-Source Voltage                                                        | $V_{DS}$        | 20         | Vdc                |
| Gate-to-Source Voltage – Continuous                                            | $V_{GS}$        | $\pm 8.0$  | Vdc                |
| Drain Current                                                                  |                 |            | A                  |
| – Continuous @ $T_A = 25^\circ\text{C}$                                        | $I_D$           | 2.8        |                    |
| – Single Pulse ( $t_p = 10 \mu\text{s}$ )                                      | $I_{DM}$        | 5.0        |                    |
| Total Power Dissipation @ $T_A = 25^\circ\text{C}$                             | $P_D$           | 1.25       | W                  |
| Operating and Storage Temperature Range                                        | $T_J, T_{stg}$  | -55 to 150 | $^\circ\text{C}$   |
| Thermal Resistance                                                             |                 |            | $^\circ\text{C/W}$ |
| Junction-to-Ambient (Note 1)                                                   | $R_{\theta JA}$ | 100        |                    |
| Junction-to-Ambient (Note 2)                                                   |                 | 300        |                    |
| Maximum Lead Temperature for Soldering Purposes, 1/8" from case for 10 seconds | $T_L$           | 260        | $^\circ\text{C}$   |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

### SOURCE-DrAIN DIODE CHARACTERISTICS

|                                |                                                                                                 |                 |        |           |          |    |
|--------------------------------|-------------------------------------------------------------------------------------------------|-----------------|--------|-----------|----------|----|
| Forward Voltage                | (I <sub>S</sub> = 1.0 Adc, V <sub>GS</sub> = 0 Vdc) (Note 3)                                    | V <sub>SD</sub> | –<br>– | 0.76<br>– | 1.2<br>– | V  |
| Reverse Recovery Time          | (I <sub>S</sub> = 1.0 Adc, V <sub>GS</sub> = 0 Vdc,<br>dI <sub>S</sub> /dt = 100 A/μs) (Note 3) | t <sub>rr</sub> | –      | 104       | –        | ns |
|                                |                                                                                                 | t <sub>a</sub>  | –      | 42        | –        |    |
|                                |                                                                                                 | t <sub>b</sub>  | –      | 62        | –        |    |
| Reverse Recovery Stored Charge |                                                                                                 | Q <sub>RR</sub> | –      | 0.20      | –        | μC |

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

3. Pulse Test: Pulse Width ≤ 300 μs, Duty Cycle ≤ 2%.

4. Switching characteristics are independent of operating junction temperature.

ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. ON Semiconductor does not convey any license under its patent rights nor the rights of others.

**onsemi**, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). **onsemi** reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and **onsemi** makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using **onsemi** products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by **onsemi**. "Typical" parameters which may be provided in **onsemi** data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. **onsemi** does not convey any license under any of its intellectual property rights nor the rights of others. **onsemi** products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use **onsemi** products for any such unintended or unauthorized application, Buyer shall indemnify and hold **onsemi** and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of the part. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
